

Please accept the following as my submission on the government Convergence study,

Please accept my comments as an answer to all of your list of questions for feedback, as they issues overlap.

My great concern is the reduction of public broadcasting funding with the expectation that a commercial model take priority.

I believe all commercial sectors should pay a fair levy to help support a healthy public broadcasting service to New Zealanders.

All sectors need to have access to information in order to create an informed society that can partake in this democracy, and that would require that Public TV, radio and online all be made available.

Thank you for considering my comments. If you have any questions, please do not hesitate to get in touch with me.

kind regards,  
a concerned citizen,  
Victoria Davis
